Office Action Summary	Application No. 10/522,450	Applicant(s) PETROS ET AL.	
	Examiner John P. Lacyk	Art Unit 3735	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3735

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gellman et al (6,096,041).

Gellman et al discloses a surgical instrument that is used to aid in treating urinary incontinence and shows (Figure 6) a first member (212) having a longitudinal section defining a longitudinal axis, and an arcuate section (220) having a proximal portion that curves away from the axis (224) and a portion distal from the proximal portion (226, 228, 230) that curves back toward the longitudinal axis (column 5, lines 19-47).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4-6, 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gellman et al in view of Brenneman et al (6,053,935).

Gellman et al discloses the claimed device except for the arcuate section having a third radius of curvature different than the others. Brenneman et al discloses a similar device and teaches (Figure 17) there being a third radius of curvature at the distal end of the arcuate section having a radius of curvature different than the others. Therefore a

modification of Gellman et al to such that the first member or handle has a hollow tubular member would have been obvious since this is merely a different embodiment of Figure 21 (which is the Gellman device).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 fails to further define any structure of the surgical instrument itself. Claim 1 is directed to a surgical instrument while claim 24 only has limitations directed to the material used with the surgical instrument and not to the instrument itself.

7. Claims 3, 8-11, 15-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
